

start here.

thank you

Thank you for downloading The Year Ahead. This page explains what you downloaded and how to print it well.

what you have

Three PDF files with the same 402 pages in three paper sizes: A5 (148 × 210 mm), A4 (210 × 297 mm) and US Letter (8.5 × 11 in). Pick the file that matches your paper or binder and ignore the others.

how to print

1. Open the PDF in Adobe Acrobat Reader or your browser.
2. In the print window choose "Actual size" or 100%, not "Fit to page".
3. For two-sided printing choose "Flip on long edge".
4. Print one page first to check the size and colours before printing the rest.

Paper of 100 gsm or thicker stops ink showing through. Any print shop can also print the file for you: give them the PDF and the paper size.

print only what you need

You do not have to print all 402 pages. The planner is undated, so print the year pages once, then one month at a time, and add the work, money, health, kitchen and notes sections as you need them. Reprint any page as often as you like.

good to know

The year-at-a-glance calendars cover 2026 and 2027. Every other page is undated and never expires. Colours can vary slightly between screens and printers.

terms of use

These files are free for your personal use. You may print as many copies as you like for yourself. Please do not sell or re-upload the files, in digital or printed form, and do not use them commercially. To share the planner, share the link to the blog post instead.
